Profile

Hi, I'm Maaz, I'm based in Nigeria and I have been working with React native & React for the last 3 years. Currently, I'm looking for a frontend-focused role but I'd be comfortable with full-stack position too as I have enough experience with Node.js and both SQL and NoSQL databases. In my free time, I like to explore and learn different things and I enjoy watching football too.

Work experience

11/2022 – Now

Abuja, Nigeria

**Frontend Mobile developer @
Pyramid Finance**

As a frontend mobile developer, I work alongside other programmers and designers to build a wide range of projects using React Native and my role focused on the frontend part of the projects, develop, maintain & debug codebase.

02/2022 – 08/2022

United Kingdom (England)

**Frontend Web & Mobile Developer @
Rama Dreams**

As a skilled frontend mobile developer, I have extensive experience in developing frontend user-friendly for web app and mobile apps. At Rama Dreams, I used React & React Native to work on a job search application for both web and mobile app as well as working on other projects while maintaining codebase and debugging.
